Microsoft
Virtual PC for Mac
Version 6.1

Microsoft
Virtual PC for Mac
Version 6.1
[How to buy](#)

The best of both worlds.

Do you need to open a Microsoft® Visio flowchart, connect to a PC network or pull information from a custom-built Windows® program launched five years ago? No problem! With Virtual PC for Mac, you can run PC programs, access PC networks and share PC files-without ever leaving your Mac. Virtual PC for Mac is a true Mac application that emulates a PC on your Mac, making it easy to run programs such as Microsoft® Access, Visio, and Project, in addition to custom-built enterprise software tools.
