Silicomp

Silicomp Interests

accélérateur de performance

- ✚ Silicomp is an engineering services company
 - The Open Source business model fits with the global company model
 - We have already open source based offerings
 - eCos, Embedded Linux, SystemC
- ✚ Focus on SystemC / TLM tools for **the software developers** who develop software for the yet-to-come hardware
 - SystemC engine, ISS, debuggers, trace analyzers, etc.
- ✚ **Open Source Software development tools** are easier to integrate than the HW oriented design tools

What do we need ?

accélérateur de performance

- ✚ An organization (preferably formal) to drive the process, collect and distribute funds
 - Gather requirements, organize and coordinate developments and Beta test, help to obtain private and public funding
 - Once approved, the projects may be carried by separate organizations
- ✚ May be a new organization, or a Steering Committee from an existing organization
- ✚ Industry funding to match public funding
