

SystemC Open Source ?

▣ Value of Open Source can be:

- Enable initial adoption when market is small (i.e.. SystemC)
- Usually “easily” extendable environment with well-defined APIs
- Commercial tools can also leverage on this code

▣ In a production context, open source

- Is not free
- Is a business model
- Is often a decision to master the environment inside the company

▣ Commercial or open source, we need:

- Support for usage of the tools
- Product-quality tools
